Loren & Nadia:

As of today (5/15), Libby Vianu and I have reached out to all 18 citizens that contacted us about the Former Naval Station Treasure Island. We talked with them by phone and also sent them email or letter correspondence. An example of the information we provided is attached.

In the future, we would greatly appreciate advanced notice before you provide our contact information to citizens or community members... especially if you anticipate the interaction may be controversial or contentious. Also, as the program manager I would appreciate it if you sent all future referrals to me. My contact information is provided below and it is in the EPA Directory.

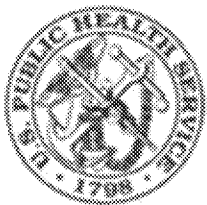

If any of the citizens decide to petition ATSDR (based on the information we provided them) we may be reaching back out to you to discuss previous work there in more detail.

If you would like to discuss Treasure Island further please let me know or stop by and see us on the first floor.

Thanks.

-Robert

Subject: Treasure Island

Dear Mr. Patterson,

This is in follow up to our conversation on Monday regarding your concerns about potential environmental exposure at the former Treasure Island Naval Base. As I mentioned, Treasure Island is not a National Priorities List Superfund site, so EPA is not the regulatory lead for cleanup oversight at the former base. The US Navy is the lead federal agency for cleanup with the California Department of Toxic Substances Control (DTSC) as the lead regulatory agency overseeing the cleanup, with support from the California Department of Public Health. EPA's role at this site is minimal and supports DTSC, which is not uncommon with regard to sites under other federal agency jurisdiction. I have informed them of our conversation and your concerns and they welcome the opportunity to discuss them with you. The Navy Project Manager is Keith Forman and he can be reached at 619-532-0913, keith.s.forman@navy.mil. The DTSC Project Manager is Remedios Sunga and she can be reached at (510) 540-3840.

In addition, if you would like a health consultation to be conducted for residents living on the Base, you can contact Libby Vianu at the Association of Toxic Substances Disease Registry. She can be reached at (415) 947-4319.

Sincerely,

Loren
